AN EXPLANATION OF SERIAL NUMBER LISTING

Each model of the 40 Series has its own individual serial number range, that is, the model 40C, 40H, 40S, 40T, 40U, 40V, and 40W each beginning with serial number 60001. In cases where serial numbers are shown and are applicable to more than one model of the 40 Series, a serial number for each model affected will be listed consecutively in the serial number column with the model designation shown in the description column.

As an example:

AM	586 T	(-60121)	Seal, oil (C)
AM	586 T	(-60080)	Seal, oil (H)
AM	586 T	(-62119)	Seal, oil (S)
AM	586 T	(-75190)	Seal, oil (T)
AM	586 T	(-65743)	Seal, oil (U)
AM	586 T	(-68217)	Seal, oil (V)
AM	586 T	(-70146)	Seal, oil (W)

Serial number information given on any page is applicable only to parts listed and illustrated on that page.

When the parentheses include only the dash (-) the part is used on all machines except in the description column.

When a serial number appears before the dash (00000-) the part was introduced beginning with that serial number and is still being used.

When a serial number appears after the dash (-00000) the part was used up to and including that serial number but was not used after that serial number.

When serial numbers appear both before and after the dash (00000-00000) the part was used beginning with the first serial number but was not used after the second serial number.

EXPLANATION OF SUBSTITUTION INFORMATION

Part substitution information given on any page is applicable only to parts listed and illustrated on that page.

PACKAGED PARTS

For added protection and ease of handling between the factory, branch houses, parts depots, and most dealers, some parts which appear in this catalog, such as gaskets, are packed in packages which contain more than one of the part. Dealers may order either the packages or the individual parts from the branch houses. However, when possible the package or multiples of the package should be specified.
